To All Port Users,

INTRODUCTION OF ENERGY SURCHARGE FROM 01 APRIL 2023

1. Jurong Port (JP) has always strived to deliver safe, reliable and high service standards to our port users. Due to recent global events and interest rate hikes, however, JP has been facing significant cost increases from energy inflation and wage pressures. As best as we can, JP will continue to absorb such cost increases or to mitigate the impact. For example, we are constantly upskilling our port workers and investing in energy saving initiatives like solar panels.
2. Despite our efforts, the increase in energy costs has been particularly substantial. The Maritime and Port Authority of Singapore (MPA) has thus granted JP the approval to apply a 5% Energy Surcharge on our regulated tariffs. This surcharge will only partially defray the increase in our energy costs, with JP continuing to bear the larger proportion of such costs. Beyond energy, JP will absorb other inflationary pressures, especially wage increases for port workers.
3. This Energy Surcharge is necessary to ensure the sustainability of the services that JP renders, and to maintain a consistent level of port operability enjoyed by all port users. It will be implemented with effect from 1 April 2023, and is applicable only to regulated tariffs (see Appendix). This surcharge will apply for a period of 12 months until 31 March 2024, subject to further review at that point. The rates for these revised tariffs constitute the tariff ceiling (i.e. maximum rate that Jurong Port can charge).
